

Release Notes

POS 5.5. Release

PCC OTC POS Client

Version 5.5
September, 2009

DOCUMENT PURPOSE

The Technical Specifications Document translates the Functional Requirements into high-level software requirements and detailed design. In addition, it describes the process flow and the impact on other groups, systems, and applications. This document is the basis for development activities during the construction phase.

CONTENTS

1 RELEASE NOTES FOR POS 5.5..... 5

1 RELEASE NOTES FOR POS 5.5

1. Enhanced the security posture of the POS to ensure compliance with all appropriate standards.
2. Updated all references to FRBC within POS Contact and Help screens.
3. Updated all references to FRBC and the FRBC Customer Service phone number within POS error code descriptions.
4. Upgraded Apache Formatting Objects Processor (FOP) from version 0.20.5 to version 0.95. This requires FORMS/XSL-FO files FORMPOP.xsl & FORMARC.xsl to be upgraded with new XSL-FO standards and should be compatible with older versions.
5. Upgraded ActiveState Perl Dev Kit to version 7.3 from version 6.0
6. Upgraded Dart SMTP, Pop, Imap Controls - PowerTCP Mail for ActiveX 2.8.
7. Upgraded Dart Web Controls - PowerTCP Web for ActiveX 1.8.
8. Upgraded POS applications login page with "508 compliance".
9. Implemented Killbit scripts for ATL vulnerability.
